

**Brookfield LaGrange Park
School District 95**

Dear District 95 Community:

Recently District 95 complied with new legislation that requires testing of water sources in public schools for lead. The District used a private firm, Aires Consulting, to conduct water-sampling tests. In all, 56 fixtures were tested within the district. 6 fixtures were found to exceed the standard of 5 parts per billion.

All 6 of these fixtures were classroom sinks found at Brook Park School. There were no findings at S.E. Gross nor were any drinking fountains found to exceed the very stringent standards outlined in the new legislation.

The six classroom sinks will be taken out of service no later than June 2.

A full report and a summary report are available on our website. You will find easy access by looking for "Water Test Results" under the Quick Links section on the left hand side of the webpage.
